The Grammar Galaxy — Teacher Guide

Escape Room 1 | 3rd Grade | 30–45 Minutes

Overview

Students navigate through 5 planets in the Grammar Galaxy, solving parts-of-speech and sentence structure challenges to collect code digits and escape. This is a self-paced, interactive Google Slides activity.

TEKS Alignment: 3.11D.vii (editing for parts of speech), 3.11D.i (complete sentences)

Skills Covered: Nouns, verbs, adjectives, adverbs, complete sentences vs. fragments

How to Assign in Google Classroom

1. **Open Google Classroom** → Click the class → **Classwork** tab
2. Click **+ Create** → **Assignment**
3. Click **Add** → **Google Drive** → Select the Grammar Galaxy Slides file
4.  **IMPORTANT:** Under the file, change the dropdown to **“Make a copy for each student”**
5. Add instructions: *“Work through each planet in order. Record your code digits on the Clue Tracker (Slide 3). Enter the Star Code at the end to escape!”*
6. Set point value (suggested: 100 points or Completion grade)
7. Set due date and **Assign**

Tip: Preview the slides in Present mode first so you can demo the clicking/navigation for students.

Timing

Setup	Activity	Wrap-Up
5 min	25–35 min	5 min

- **Setup:** Explain the concept, demo Slide 1–3, show how to click answers
 - **Activity:** Students work independently or in pairs
 - **Wrap-Up:** Celebrate who escaped, review tricky questions
-

Tips for Differentiation

For Struggling Learners:

- Pair with a stronger student (partner escape)
- Provide an anchor chart of parts of speech definitions
- Let students use the hint slides without penalty

- Pre-teach vocabulary in the sentences before starting

For Advanced Learners:

- Challenge them to complete it in under 20 minutes
- Have them write their OWN sentence for each planet after completing
- Ask them to explain WHY each wrong answer is wrong
- Extension: Create a 6th planet with their own questions

For ELL Students:

- Pre-teach key vocabulary (eagle, ancient, bloom, peacefully)
 - Allow use of bilingual dictionary
 - Pair with a bilingual buddy
-

Center vs. Whole Class

As a Literacy Center (Recommended):

- Load on classroom devices/Chromebooks
- Students rotate through during center time
- Takes 1–2 center rotations to complete
- Print the Clue Tracker slide for students who prefer paper tracking

As a Whole Class Activity:

- Project and work through together (less ideal — removes self-pacing)
 - Better option: Everyone starts together, works at own pace
 - Use a visible timer for motivation
 - First 5 to escape get a small prize/recognition
-

Extension Activities

1. **Create Your Own Planet:** Students design a 6th planet with 4 questions on a part of speech of their choice
2. **Grammar Galaxy Journal:** Students write a short story using at least 3 nouns, 3 verbs, 3 adjectives, and 3 adverbs — underline and label each
3. **Parts of Speech Sort:** Give students a passage and have them sort words into noun/verb/adjective/adverb columns
4. **Fragment Fix-It:** Students take the fragments from Room 5 and rewrite them as complete sentences

Troubleshooting

Issue	Solution
Links don't work	Make sure students are in Present mode (not Edit)
Student is stuck	Direct them to re-read the hint slide; check if they're clicking the answer shapes
Student finishes early	Extension activities above, or have them help a classmate
Wrong code at the end	Have student revisit the room where they're missing a digit

Assessment

This activity works as: - ☒ Formative assessment (observe which rooms students struggle with) - ☒ Practice/review activity - ☒ Test prep (parts of speech identification) - ☒ Sub plans (self-directed, minimal teacher involvement needed) - ☒ Completion grade or participation points

To grade for accuracy: Use the Answer Key to check student responses on their individual copy of the slides.

The Grammar Galaxy — Answer Key

Escape Room 1 | 3rd Grade

Star Code: 73195

Room 1: Planet Noun (Digit: 7)

#	Sentence	Correct Answer	Why It's Correct
1	The ____ flew across the sky.	B) eagle	Eagle is a thing (animal) — a noun. “Quickly” is an adverb; “flew” is a verb.
2	We visited the tall ____ downtown.	A) building	Building is a thing/place — a noun. “Visited” is a verb; “tall” is an adjective.
3	Her ____ made everyone smile.	C) kindness	Kindness is an idea — an abstract noun. “Made” is a verb; “everyone” is a pronoun (accept if students choose this, but kindness is the target noun in the blank).
4	The ____ played in the park.	B) children	Children is a person (people) — a noun. “Played” is a verb; “in” is a preposition.

Common Mistakes: - Confusing verbs ending in -ing with nouns (e.g., “running” can be both — teach context) - Missing abstract nouns like “kindness” — students often only think of concrete nouns - Choosing “everyone” in Q3 — it IS a pronoun/noun, but the blank targets “kindness”

Room 2: Planet Verb (Digit: 3)

#	Sentence	Correct Answer	Why It's Correct
1	The dog ____ over the fence.	B) jumped	Jumped shows action — what the dog did.
2	She ____ a beautiful song at the concert.	C) sang	Sang shows action — what she did.
3	The flowers ____ in the spring garden.	A) bloom	Bloom shows action — what the flowers do.
4	My brother ____ his homework every night.	C) finishes	Finishes shows action — what the brother does.

Common Mistakes: - Choosing nouns that seem “active” (e.g., “concert” sounds exciting but isn’t a verb) - Missing irregular verb forms like “sang” (past tense of “sing”) - Confusing “bloom” — students may think it’s a noun (a bloom), but here it’s used as a verb

Room 3: Planet Adjective (Digit: 1)

#	Sentence	Correct Answer	Why It's Correct
1	The ____ kitten played with yarn.	B) tiny	Tiny describes the kitten — what kind of kitten? A tiny one.
2	We ate ____ pizza for dinner.	C) delicious	Delicious describes the pizza — what kind?
3	The ____ castle stood on the hill.	A) ancient	Ancient describes the castle — what kind?

#	Sentence	Correct Answer	Why It's Correct
4	She wore a ____ dress to the party.	B) sparkly	Sparkly describes the dress — what kind?
5	Three ____ birds sat on the wire.	C) colorful	Colorful describes the birds — what kind?

Common Mistakes: - Confusing adjectives with adverbs (both describe, but adjectives describe NOUNS) - Missing that numbers can be adjectives (“three” in Q5 is also an adjective, but “colorful” is the target) - Choosing the noun instead of the adjective — remind students adjectives DESCRIBE the noun

Room 4: Planet Adverb (Digit: 9)

#	Sentence	Correct Answer	Why It's Correct
1	The rabbit hopped ____ across the yard.	B) quickly	Quickly tells HOW the rabbit hopped. Ends in -ly.
2	She ____ finished her test before anyone else.	A) easily	Easily tells HOW she finished. Ends in -ly.
3	The baby slept ____ in the crib.	C) peacefully	Peacefully tells HOW the baby slept. Ends in -ly.
4	He will arrive ____.	B) tomorrow	Tomorrow tells WHEN he will arrive. (Doesn't end in -ly!)

Common Mistakes: - Students rely too heavily on the “-ly” rule and miss Q4 (tomorrow) - Confusing adverbs with adjectives — remind: adverbs describe VERBS (how/when/where the action happens) - Choosing “will” in Q4 — it's a helping verb, not an adverb

Room 5: Planet Sentences (Digit: 5)

#	Sentence	Correct Answer	Why It's Correct
1	"The cat sat on the mat."	A) Complete Sentence	Has subject (cat), verb (sat), complete thought.
2	"Running through the field."	B) Fragment	No subject — WHO is running? Missing!
3	"Because it was raining outside."	B) Fragment	Has subject + verb BUT starts with "because" — dependent clause, not a complete thought.
4	"My teacher reads to us every day."	A) Complete Sentence	Has subject (teacher), verb (reads), complete thought.
5	"The big, scary, green."	B) Fragment	Just adjectives + article — no verb, no complete thought.

Common Mistakes: - Q3 is the trickiest — students see a subject ("it") and verb ("was raining") and think it's complete. Teach that "because" makes it a dependent clause that needs more information. - Q5 — students may think adjectives alone make a sentence. Ask: "What about the big, scary, green WHAT? What did it DO?" - Q2 — "-ing" words feel like verbs but "running" alone (without a helper like "is" or "was") doesn't make a complete predicate.
